Additional Topics, Questions, and Follow-up

- Construction Fees (part 75-construction fees-SIP related) Title V and NSR and rulemaking activities: Not a priority NMED still doing background investigation. Had an update meeting. Not going forward with the fee schedule for this year or next (place on hold-- but keep it on the agenda, NMED needs to keep this in the focus) Oil and Gas tail pipe fee is likely changing to ?
- 2021 Exceptional Event demonstrations, Armando: Planning on doing the 2021 submitted by the end of the year. Continue to work with Josh Madden. Did NMED's notification letter go out?
- 111(d) Emission Guidelines for Oil & Gas: We issued a proposal on November 2nd (signature date, Nov. 15 was publication date). EPA received nearly 500,000 written comments during the public comment period. We are reviewing these comments now as we develop a supplemental proposal to further strengthen standards from the proposal. We expect to issue the supplemental proposal later this year.

Upcoming rule making activities

Incorporation by refer (IBR) for MAC, NESHAP, and performance standards for NNSR. Looking for a Q1 date. Hearings hope to be scheduled for Q1 2023.

Other items for status follow-up or separate discussions.
